

Specialist Marine Insurance Solutions designed around your clients' unique supply chain and logistics risks.

WHO IS SAPPHIRE MARINE?

Marine insurance is about far more than moving cargo, it is about protecting businesses throughout an increasingly complex global supply chain.

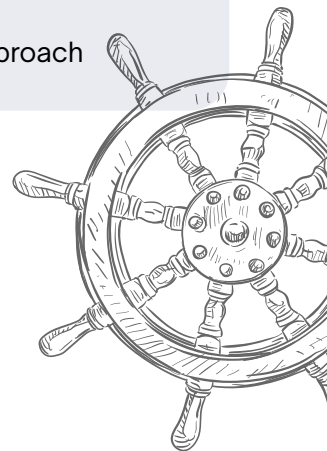

At Sapphire Marine, we partner with brokers to deliver specialist Marine and Logistics insurance solutions built on technical expertise, commercial underwriting and responsive service.

Our experienced underwriting team takes the time to understand every client's operations, identifying their unique exposures before designing practical insurance programmes that provide meaningful protection from origin to final destination.

Rather than applying a standardised approach, every risk is individually assessed to ensure the solution reflects the client's business, objectives and operational realities.

WHY BROKERS CHOOSE SAPPHIRE MARINE

- Specialist Marine Underwriters
- Tailored Risk Solutions
- Technical Marine Expertise
- Responsive Turnaround Times
- Relationship-Driven Service
- Practical Claims Support
- Flexible Underwriting Approach

OUR MARINE VALUE PROPOSITION

Best People

People remain at the centre of everything we do. Our Marine specialists understand transport, logistics, international trade and supply chain risks. We believe successful partnerships are built on accessibility, technical expertise and sound underwriting judgement.

Best Data

Better decisions begin with better information. Every underwriting decision is supported by meaningful risk information and technical analysis. We invest the time to understand each client's operations before recommending an insurance solution.

Best Solution

Every business is different. Our flexible underwriting philosophy enables us to build practical, sustainable insurance programmes that respond to real-world exposures rather than generic risks. **Our objective is simple, provide the right solution for the right risk.**
